

Access aid for wall mounting with round sleeve

9699195

GTIN: 4007126003270

EN 14396 requires that access aids (holding devices) are installed in shafts. Projection at least 1 m above the surface. The shaft must have a minimum depth of 1.60 m, since the entry aid can not be completely sunk!

Material

Stainless steel 1.4571 / AISI 316 ti

- The access aid consists of a guide sleeve and retaining bar with handle.
- By repositioning the locking screw on the retaining tube, the boarding aid can also be used as a clip-on aid (mobile use).
- The handle can also be fitted pointing to the right or left.
- Sliding guide in the sleeve at the top and bottom for easy engagement of the grab rail.
