

## Chain drive for high safety device

**9698251**

GTIN: 4007126047953

According to DIN EN 360 and DIN EN 1496 Hailo high-altitude safety device with rescue lifting device and reel chain, the special alternative for every application site. The reel chain makes it easy to use the winch of the device, even if the lifting point of the device is very high.

- Example of use: Inspection of shafts. The high-altitude safety device is permanently mounted on a vehicle, the attachment point is very high, so that rescue by means of manual crank operation would no longer be possible.
