Feeding station dog

3290001

GTIN: 4007126302670

Built-in modules for kitchen cabinets with hinged doors from 400 mm width

SWING

Suitable for cabinet width (cm)
40, 45, 50, 60

The HAILO feeding station for the pet has one or two bowls (stainless steel) fixed on a rounded platform on the cabinet door. The platform can be lowered to the floor after the door is opened, and when feeding is finished, it can be pulled up and folded away directly. Thus, there are no feed bins in the way.

Thanks to the hanging and unhanging function and the practical carrying handle, the entire unit can be effortlessly removed, transported and placed in another location.

The built-in module fits on every hinged door of kitchen cabinets from 40 cm width and disappears invisibly in the cabinet. The built-in module is also suitable for retrofitting.

For cleaning or filling, the bowls can be easily removed from the station.

Additional modules such as a storage board and the "Flexi Kit" universal box for storing and stocking feed and accessories complete the system.

Specifications

Type of installation Swing	✔
Cabinet-width min. (cm)	40
