Smart built-in system for growing healthy microgreens

INSET

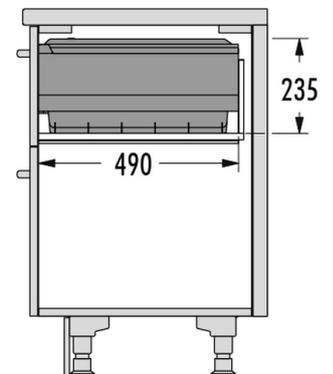

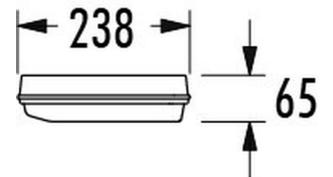

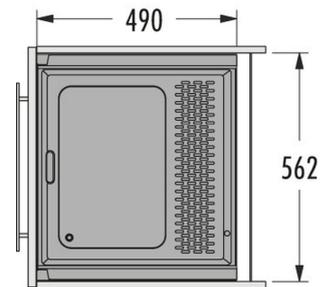

Suitable for cabinet width (cm)
60

With the HAILO Micro Garden, growing microgreens is a clean affair. Neatly stored in the drawer and with little effort thanks to app control and automated lighting and ventilation, growing healthy sprouts is child's play. The aromatic sprouts can be harvested after only 5-10 days and enrich the menu with tasty flavours and healthy vital substances all year round.

- Smart built-in system for growing a variety of microgreens
- Four removable trays for growing different sprouts
- Neatly stored in drawers with a width of 60 cm
- Clean and hygienic thanks to seed pads - no planting soil required
- Low effort thanks to automated lighting and ventilation
- Light module with special plant LED in the lid
- Automatic day-night cycle
- Smart control via an app
- Two different plant programmes possible at the same time
- Standard plant programme also possible offline
- Power supply via 12 V mains adapter

The HAILO Micro Garden System consists of:

a tray with inserted plastic grate,
4 removable trays with lids,
tile and perforated grates,
a sliding lid with integrated lighting and ventilation unit
as well as a starter set of seed mats.
