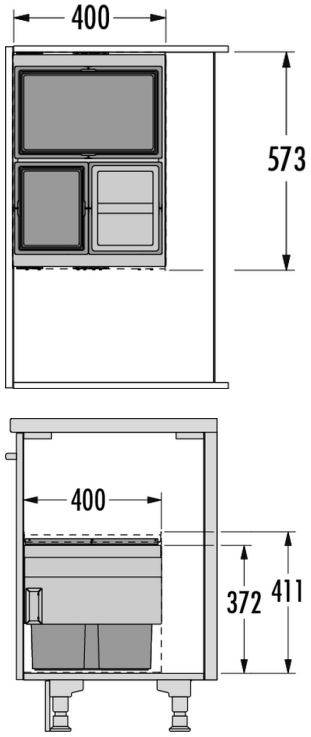
- Can be used on the right and left in the cabinet
- Space for water purifier: 280 mm



Cargo Aqua, the waste separation system for sink base units with water purifier.

The HAILO Cargo Aqua is a waste separation system for front-mount-door cabinets in which a water purifier is to be integrated at the side. Thanks to the metal housing designed specifically for this purpose, the Cargo Aqua only requires one side of the base cabinet to connect the pull-out runner, while the stable sheet steel housing, free-standing in the room, serves as the opposite side for the second rail connection. This makes it possible to keep a space free at the side of the cabinet to accommodate, for example, water purifiers, water dispensers or similar items.
The waste separation system was designed for cabinet widths of 600 mm, 750 mm and 900 mm and can be installed on the left or right of the cabinet as required. Matching front connection fittings included.
